ABSTRACT

A method of delivering data to one or more data-handling devices, the method comprising the steps of: storing data that is intended for transmission to the data-handling device according to a predetermined template which provides a plurality of fields each of said fields being capable of containing a portion of the data; providing mappings that map the data within the fields of the predetermined template to fields within alternative templates should it be determined that the data-handling device is not capable of handling data held in the predetermined template; and transmitting the data to the data-handling device.

To be accompanied, when published, by Figure 3 of the drawings.
